VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications our practice was asked to re-examine the **LONHRO ex ANDRIOLI, 2019 black yearling filly**, brands described as **Capitals N and P between horizontal bars** nr sh., **14 over 9** off sh., to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of Dynamic Syndications at Bimbadeen Park, Agnus Banks, NSW on the 2nd April 2021, where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (low risk). I advised my client at the time; in my opinion the filly was suitable for their purchase.

Clinical Examination:

The re-examination was performed at Gooree Park, Mudgee, NSW where the filly has been spelling since 5 April, 2021. It was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly had a quiet temperament.

The filly remains a high-quality individual, athletic and free moving. She is well conformed and well balanced. The filly is still immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed.

Conclusion:

In my opinion as at the **8th JUNE 2021**, the date of re-examination, the **LONHRO ex ANDRIOLI, 2019 black yearling filly** is in so far as can be determined from the examination conducted presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
8 June 2021

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-purchase veterinary examination was conducted on the **LONHRO ex ANDRIOLI, 2019 black yearling filly**, brands described as **Capitals N and P between horizontal bars** nr sh., **14 over 9** off sh., and was carried out at BIMBADEEN PARK, Agnus Banks, NSW, on the 2nd April 2021.

Clinical Examination:

She is a quality, well conformed, tall (15.3hh), athletic, yearling that has completed breaking-in and educated. A 3yo miler style of individual however she is well developed and appears precocious, so consideration could be given to training her to be a possible late 2yo prospect. She was presented in excellent condition. She has a deep girth and good bone for a yearling by this sire. She has a good action and stands over good ground. The filly is still immature and will develop further. All clinical parameters were found to be within normal limits. She was examined in hand and found to be free moving. Heart auscultation was normal. There was no clinical evidence of wear or injury to extremities.

Radiographic Examination:

A pre-purchase inspection of a set of radiographs were undertaken. Upon examination, they were considered **low risk**, as there were no findings of any significance noted.

Endoscopic Examination:

Pre-purchase inspection of the upper respiratory tract was undertaken endoscopically, and the filly was passed with the larynx and pharynx found to be **Grade 1**, being normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, this **LONHRO ex ANDRIOLI, 2019 black yearling filly**, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this yearling was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
