VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications our practice was asked to re-examine the **ZOUSTAR ex LOCKET, 2019 bay yearling colt**, brands described as **Capitals J and T over lazy 2** nr sh., **96 over 9** off sh., to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of Dynamic Syndications at the 2021 William Inglis Classic Yearling Sale at the Inglis Riverside Stables Sales Complex, Warwick Farm, NSW, on the 5th February 2021, prior to the commencement of the 2021 Inglis Classic sale where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (low risk). I advised my client at the time; in my opinion the colt was suitable for their purchase.

Clinical Examination:

The re-examination was performed at Bimbadeen Park, 50 Sylvan Rd, Werombi, NSW where the colt has been spelling since 30 June 2021. It was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

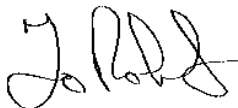

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The colt had a quiet temperament.

The colt remains a high-quality individual, athletic and free moving. He is well conformed and well balanced. The colt is still immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed.

Conclusion:

In the opinion of my associate as at the **20th JULY 2021**, the date of re-examination, the **ZOUSTAR ex LOCKET 2019 bay yearling colt**, is in so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
20 July 2021

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination was conducted on **Lot 111 ZOUSTAR ex LOCKET, 2019 bay yearling colt**, brands as described in the 2021 William Inglis Classic Yearling Sale Catalogue, was carried out at the Inglis Riverside Stables Sales Complex, Warwick Farm, NSW, on the 5th February 2021, prior to the commencement of the 2021 Inglis Classic sale.

Clinical Examination:

He is an athletic, well conformed, quality individual, presented in good condition. He has a deep girth and good bone. He walks close and stands over good ground. The colt is still immature and will develop further. All clinical parameters were found to be within normal limits. He was examined in hand and found to be free moving. Heart auscultation was normal. Both testicles were present. There was no clinical evidence of wear or injury to extremities.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the William Inglis Complex. Upon examination, they were considered **low risk** and there were no radiographic findings of any significance noted.

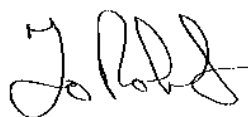

Endoscopic Examination:

Pre-sale the upper respiratory tract was examined endoscopically, and the colt was passed with the larynx and pharynx found to be **Grade 1**, being normal in appearance and function. Post-sale a secondary endoscopic evaluation was conducted and passed the colt was passed.

Conclusion:

In my opinion, at the time of this examination, **Lot 111, ZOUSTAR ex LOCKET, 2019 bay yearling colt**, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
