VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications our practice was asked to re-examine the **SNITZEL ex MARCIA PROBA, 2020 Chestnut yearling colt**, brands described as a **Capital F inside box on axis** nr sh., **22 over 0** off sh., to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of Dynamic Syndications at the Inglis Melbourne Premier Sale, Oaklands Junction, Vic on the 25th February 2022, where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (low risk). I advised my client at the time; in my opinion the colt was suitable for their purchase.

Clinical Examination:

The re-examination was performed on the 20th May 2022 at Bimbadeen Park, Agnes Banks, NSW, where the colt is spelling. This was a general health check which included: temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The colt has a quiet temperament.

The colt remains a high-quality individual, athletic and well-balanced. He is very well conformed and free moving. The colt is still immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, drug sampling blood tests, ECG or upper respiratory endoscope were performed.

Conclusion:

In my opinion as at the **20th MAY 2022**, the date of re-examination, the **SNITZEL ex MARCIA PROBA Chestnut yearling colt**, is in so far as can be determined from the examination conducted presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
20 May 2022

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination was conducted on **Lot 77 SNITZEL x MARCIA PROBA, 2020 Chestnut Yearling Colt**, brands as described in the 2022 William Inglis Melbourne Premier Yearling Sale Catalogue, at the Inglis Sales Complex, Oaklands Junction, VIC, NSW, on the 25th February 2022, prior to the commencement of the 2022 Inglis Premier sale.

Clinical Examination:

He is an athletic, very well conformed, high-quality individual, presented in excellent condition. He has a deep girth and good bone. He walks well with an excellent action and stands over good ground. The colt is still immature and will develop further. All clinical parameters were found to be within normal limits. He was examined in hand and found to be free moving. There was no lameness at the walk and trot. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The colt has a quiet temperament. Heart auscultation was normal. Both testicles were present. There was no clinical evidence of wear or injury to extremities. This general health check included: temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the William Inglis Complex. Upon examination, they were considered **low risk** and there were no radiographic findings of any significance noted.

Endoscopic Examination:

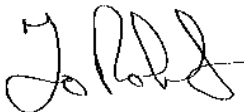

Pre-sale the upper respiratory tract was examined endoscopically, and the colt was observed to have normal anatomy. Laryngeal function was normal, symmetrical and synchronous; considered **Grade 1** (normal - Lane Scale). Post-sale a secondary endoscopic evaluation was conducted, and the colt was passed.

Conclusion:

In my opinion, at the time of this examination, **Lot 77 SNITZEL x MARCIA PROBA, 2020 Chestnut Yearling Colt**, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover.

I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for them to purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
