VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, I was asked to re-examine the **CALYX (GB) ex AQUA D'AMORE, 2021 Bay yearling Filly**, brands described as a **Capital C** nr sh., **56 over 1** off sh., to assess her continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet their ongoing compliance with regulatory requirements, by supplying a current veterinary certificate not over 30 days from the date of inspection, for inclusion with their PDS.

I had previously re-inspected this horse on behalf of my client Dynamic Syndications on the 29th November 2022 at Bimbadeen Park, Werombi, NSW, at that time for an ongoing compliance certificate.

I had first inspected this filly at the Magic Millions National Weanling Sale, Bundall, Qld, on the 17th May 2022, prior to the commencement of that Sale, where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (low risk). I advised my client at the time; in my opinion the filly was suitable for their purchase.

Clinical Examination: This re-examination was conducted on 14th April 2023. The filly is currently spelling at Gooree Park, Mudgee, NSW. The re-examination was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found.

The filly remains a quality individual, athletic and free moving. She is well conformed and well balanced. The filly is still immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, ECG or upper respiratory endoscope were performed.

Conclusion:

In my opinion as at the **14th APRIL 2023**, the date of re-examination, the **CALYX (GB) ex AQUA D'AMORE 2021 Bay yearling filly**, is in so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
14 April 2023

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.
