VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, I was asked to re-examine the **LONHRO ex RADAR, 2021 Bay yearling Filly**, brands described as a **Capital P Ampersand Capital A** nr sh., **5 over 1** off sh., to assess her continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements, by supplying a current veterinary certificate not over 30 days from the date of inspection, for inclusion with their PDS.

This re-examination conducted on 14th April 2023, was conducted at 39 days, post the original examination of 3rd March 2023. As it was 9 days beyond its maturity date, it is a requirement of the promoter that this additional current veterinary certificate be lodged to maintain compliance and regulatory requirements.

I had previously inspected this horse on behalf of my client Dynamic Syndications at the Inglis Melbourne Premier Yearling Sale, Oaklands Junction, Vic on the 3rd March 2023, prior to the commencement of the Sale, where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (low risk). I advised my client at the time; in my opinion the colt was suitable for their purchase.

Clinical Examination: The filly is currently spelling at Gooree Park, Mudgee, NSW. The re-examination was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found.

The filly remains a high-quality individual, athletic and free moving. She is well conformed and well balanced. The filly is still immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, ECG or upper respiratory endoscope were performed.

Conclusion:

In my opinion as at the **14th APRIL 2023**, the date of re-examination, the **LONHRO ex RADAR, 2021 Bay yearling filly**, is in so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
14 April 2023

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination was conducted on **Lot 63, LONHRO ex RADAR Bay yearling filly**, brands **Capital P Ampersand Capital A** nr shoulder, **5** over **1** off shoulder, as described in the 2023 Inglis Melbourne Premier Sale Catalogue. This was carried out at the Inglis Sale Complex, Oaklands Junction VIC, on the **3rd March 2023**, prior to the commencement of the Inglis Premier sale.

Clinical Examination:

A high-quality individual presented in excellent condition. She is athletic, with good size and strength. She has good length of rein and a deep girth. She stands over good ground. The filly is still immature and will develop further. All clinical parameters were found to be within normal limits. There was no clinical evidence of wear or injury to extremities. This clinical health check included: temperature, pulse, respiration, thoracic auscultation, an eyesight ophthalmoscope examination, mucous membrane colour, musculature symmetry and basic conformation evaluation, where no abnormalities were found.

She was examined in hand and was found to be free moving. There was no lameness at the walk and trot. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly has a quiet temperament.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the Inglis Complex. Upon examination, the X-rays were considered **low risk**, and there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically, and the larynx and pharynx were found to be **Grade 1** (Lane), normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, my overall rating score was high – **PASS, 8**.

Lot 63, LONHRO ex RADAR Bay yearling filly, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
