VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications our practice was asked to re-examine the **MICROPHONE x SE SAUVER 2021 Bay Yearling Filly**, brands described as **Capital M 3 over scroll** nr sh., **28 over 1** off sh., to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

The horse had previously been inspected on behalf of Dynamic Syndications at the Inglis Australian Weanling Sale, Warwick Farm, NSW, on the 4th May 2022, where a detailed pre-purchase inspection was conducted including a full set of x-rays in the repository being read which were considered **low risk**, and an endoscopic evaluation was conducted post-sale which was **Grade 1 (low risk)** (normal in appearance and function). My client was advised at the time; the filly was suitable for their purchase.

Clinical Examination:

This re-examination was performed on the 29th November 2022 at Bimbadeen Park, Werombi, NSW, where the filly has been located since arriving from Gooree Park. This was a general health check which included: temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly has a quiet temperament.

The filly remains a free moving, quality individual. She is well balanced, well conformed, with good bone and overall strength. She possesses an athletic, conformation. The filly as expected is still quite immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed.

Conclusion:

In my opinion as at the **29th NOVEMBER 2022**, the date of re-examination, the **MUCROPHONE x SE SAUVER, 2021 Bay Yearling Filly**, so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
29 November 2022

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination was conducted on **Lot 323, MICROPHONE ex S SAUVER, 2021 Bay Weanling Filly**, brands: capital **M 3 over scroll** nr shoulder, **28 over 1** off shoulder, as described in the 2022 Inglis Australian Weanling Sale Catalogue. This inspection was conducted at Coolmore Stud, Jerry's Plains NSW, on the 4th May 2022, the day prior to the Sale.

Clinical Examination:

The filly presented as a high-quality individual, in excellent condition. Well conformed, athletic, short-coupled sprinter type, with good scope, a deep girth, and moves well. The filly is still immature and will develop significantly further. All clinical parameters were found to be within normal limits. She was examined in hand and was found to be free moving. Stethoscope examination of heartbeat was normal. There was no clinical evidence of wear or injury to extremities.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection. Upon examination, they were considered **low risk** as there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post-sale, for the purchaser, I conducted an upper respiratory tract examination endoscopically. She was passed with the larynx and pharynx found to be rated **Grade 1 (low risk)** (normal in appearance and function).

Conclusion:

In my opinion, at the time of this examination, **Lot 323, MICROPHONE ex SE SAUVER, 2021 Bay Weanling Filly**, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover.

I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
