## VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, I was asked to re-examine the **TOO DARN HOT (GB) ex PHENETIC 2021 Bay yearling filly**, brands described as **Capital S inside C** nr sh., **76 over 1** off sh., to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of my client Dynamic Syndications at the Magic Millions Yearling Sale, Bundall, Qld on the 8th January 2023, prior to the commencement of the Sale where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (low risk). I advised my client at the time; in my opinion the filly was suitable for their purchase.

**Clinical Examination:** This re-examination was conducted on 7th July 2023. The filly is currently spelling at Gooree Park, Mudgee, NSW. This inspection was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly has a quiet temperament.

The filly remains a high-quality individual, athletic and free moving. She is well conformed and well balanced. The filly has grown significantly since she was purchased. She is still immature and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed.

### Conclusion:

In my opinion as at the **7th JULY 2023**, the date of re-examination, the **TOO DARN HOT (GB) ex PHENETIC 2021 Bay yearling filly**, is in so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

**Dr. T.M.B. Roberts BVSc. MRCVS**  
**7 July 2023**

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

## VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination was conducted on **Lot 233, TOO DARN HOT (GB) ex PHENETIC (GB) Bay yearling filly (NZ)**, brands **Capital S inside C** nr shoulder, **76** over **1** off shoulder, as described in the 2023 Magic Millions Yearling Sales Catalogue. This was carried out at the Magic Millions Sale Complex, Bundall QLD, on the **8<sup>th</sup> January 2023**, prior to the commencement of the Magic Millions sale.

### Clinical Examination:

A well conformed, high-quality individual presented in excellent condition. She is very athletic, has good length of rein and a deep girth. She stands over good ground. The filly is still immature and will develop further. She is typical of a filly raised in NZ to a European sire and dam. She is a neat, lighter bone style of individual who on conformation appears suited to be aimed at 3yo mile to middle distances. All clinical parameters were found to be within normal limits. There was no clinical evidence of wear or injury to extremities. This clinical health check included: temperature, pulse, respiration, thoracic auscultation, an eyesight ophthalmological examination, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found.

She was examined in hand and was found to be free moving. There was no lameness at the walk and trot. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly has a quiet temperament.

### Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the Magic Millions Complex. Upon examination, the X-rays were considered **low risk**, and there were no radiographic findings of any significance noted.

### Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically, and the larynx and pharynx were found to be **Grade 1**, normal in appearance and function.

### Conclusion:

In my opinion, at the time of this examination, my overall rating score was – **PASS, 7+**.

**Lot 233, TOO DARN HOT (GB) ex PHENETIC (GB) Bay yearling filly (NZ)**, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

**Yours faithfully,**

**Dr. T.M.B. Roberts BVSc. MRCVS**
