VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination was conducted on **Lot 706, KINGMAN (GB) ex GENA (FR) Bay yearling colt**, brands **Jockey Cap over 3 Diamonds** nr shoulder, **57** over **2** off shoulder, as described in the 2024 Magic Millions Yearling Sales Catalogue. This was carried out at the Magic Millions Sale Complex, Bundall QLD, on the **8th January 2024**, prior to the commencement of the Magic Millions sale.

Clinical Examination:

A high-quality individual presented in excellent condition. He is an athletic, well-balanced, neat style of individual. A Classical European middle-distance prospect who will appreciate racing beyond a mile once distances increase as an older 3yo and older horse. He has a good length of rein and a deep girth. He stands over good ground. The colt is still quite immature and will develop and strengthen significantly further over the next 6 months. All clinical parameters were found to be within normal limits. There was no clinical evidence of wear or injury to extremities. This clinical health check included: temperature, pulse, respiration, thoracic auscultation, an eyesight ophthalmological examination, mucous membrane colour, musculature symmetry and basic conformation, where no abnormalities were found. He was examined in hand and was found to be free moving. There was no lameness at the walk and trot. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The colt has a quiet temperament.

The yearling is described as a Rig. One testical has descended into the scrotum, the other is retained in the abdomen. This is common in male thoroughbred horses and would not prevent the horse from training, racing and would not prevent him performing stud duties or from being gelded.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the Magic Millions Complex. Upon examination, the X-rays were considered **low risk**, and there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically, and the larynx and pharynx were found to be **Grade 1**, normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, my overall rating score was – **PASS, 7**.

Lot 706, KINGMAN (GB) ex GENA (FR) Bay yearling colt, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS

16 January 2024

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.
