**'Striving for excellence in the
maintenance and performance of your horse'**

1 November 2024

To whom this may concern,

SUITABILITY TO SYNDICATE EXAMINATION

Horse Name: Unnamed (AUS) 2022

Signalment: 2 y/o bay thoroughbred filly

Sire: Prague (AUS) / **Dam:** I'm in love (USA)

Microchip: 985100012219594

Brands NSS: G S over C / **Brands OSS:** 30 over 2

DOB: 985100012219594

Location: Booleroo, Theresa park, NSW

The above horse was examined today as part of a suitability to syndicate examination.

This included, but was not limited to; cardiac and thoracic auscultation and assessment of musculature symmetry and basic conformation. No abnormalities were found at time of consult.

Ocular examination was within normal limits.

A soundness exam was then performed, whereby no lameness was discernible at the walk and/or the trot on both the straight/circle at time of consult. The horse did not exhibit any lameness following joint flexion of the limbs.

Palpation of the tendons did not reveal any overt thickening or any pain response. Hoof testers applied to all four feet did not elicit any withdrawal response. The patient was not shod at time of consult. There is some mild thickening of the fascia on the dorsal aspect of the proximal, left hind cannon. This is associated with a small, scar present at the same point of the limb. The extensor tendons do not appear to be involved/compromised.

An endoscopic examination of the upper airways was then performed, which revealed grade 2 laryngeal function (normal finding). No mucous or blood was noted in the trachea. There was no dorsal displacement of the soft palate (DDSP) at time of examination.

No additional ancillary procedures (such as radiographs, haematological examination, drug sampling and/or ECG) were performed at time of examination.

I certify that I have no current or future interest in the above horse other than the supply of this veterinary report.

**PLEASE ENSURE THAT THIS REPORT IS FORWARDED TO THE HORSE'S OWNER AND THE PERSON RESPONSIBLE FOR THE FUTURE CARE
OF THE HORSE, AS WELL AS TO THE INSURER, IF APPLICABLE**

Should you have any further queries regarding the above report, please don't hesitate to contact myself at wade@wollondillyequine.com or at +61 02 4659 7322

Yours sincerely,

CENTENNIAL PARK VETERINARY PRACTICE

A.B.N. 91 072 794 944

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications on **Wednesday 25th September 2024** our practice was asked to re-examine the **PRAGUE x I'M IN LOVE Bay 2YO Filly**, brands described as **Capitals G S over C** nr sh., **30 over 2** off sh., to assess its continued suitability for public syndication or private retention for racing. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements which includes the supply of a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of Dynamic Syndications at Gooree Park Stud, Mudgee NSW, on the 17th July 2023, where a detailed inspection was conducted including a survey set of x-rays which were considered **low risk**. My client declared at that time, for the avoidance of a perceived or potential conflict of interest, that this horse had been bred by Fengood P/L, a company associated with the promoter and a joint partner. The filly was suitable for their public syndication or their retention for racing or syndication.

Clinical Examination:

This re-examination was performed on the **25th September 2024** at Bimbadeen Park, Werombi, NSW, where the filly has been located since arriving from Gooree Park. This was a general health check which included: temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and basic conformation. No abnormalities were found. There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly has a quiet temperament.

The filly remains a free moving, quality individual. She is well balanced, well conformed, with good bone and overall strength. She possesses an athletic conformation. The filly has developed significantly since my previous inspection but is still immature due to her foaling date and will develop further. All clinical parameters were found to be within normal limits. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed.

Conclusion:

In my opinion, as of **25th SEPTEMBER 2024** the date of re-examination, the **PRAGUE x I'M IN LOVE 2022 Bay 2YO Filly** so far as can be determined from the examination conducted, presents in good health, and passed clinical examination, and remains suitable for all risk mortality insurance cover and is suitable for retention for racing and for public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
25 September 2024

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

CENTENNIAL PARK VETERINARY PRACTICE

A.B.N. 91 072 794 944

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, for compliance purposes, a veterinary examination was conducted on the **PRAGUE x I'M IN LOVE Bay Weanling Filly**, brands **Capitals G S over C** nr shoulder, **30** over **2** off shoulder as recorded with the Australian Stud Book. This was carried out at Gooree Park Stud, Mudgee, NSW on Monday **17th July 2023**, to ensure the promoter had a current veterinary certificate prior to lodging documents for approval with Racing NSW as lead regulator. For the avoidance of a perceived or potential conflict of interest, it is declared that this horse was bred and retained by Fengood P/L, a company associated with the promoter and a joint partner.

Clinical Examination:

She is a well conformed, quality individual, presented in good condition. She is a strong style of individual, athletic, with conformation that suggests a Spring 3yo sprinting type who should lengthen to a mile. She has a good length of rein and a deep girth. She stands over good ground. The filly is still quite immature as expected for her foaling date and will develop and strengthen further over the next 6-12 months. All clinical parameters were found to be within normal limits. There was no clinical evidence of wear or injury to extremities. This clinical health check included: temperature, pulse, respiration, thoracic auscultation, an eyesight ophthalmological examination, mucous membrane colour, musculature symmetry and basic conformation was conducted with no abnormalities found.

She was examined in hand and was found to be free moving. There was no lameness at the walk and trot. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly displays a quiet temperament.

Radiographic Examination:

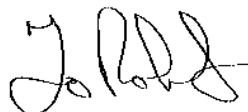

A survey set of radiographs were taken by the stud's attending veterinarian Dr David Parry-Okeden B.V.Sc. on 11 July 2023. Upon examination, the X-rays were considered **low risk**, as there were no radiographic findings of any significance noted.

Conclusion:

In my opinion, at the time of this examination, my overall rating score was a **PASS, 7+**.

PRAGUE x I'M IN LOVE Bay Weanling Filly, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this weanling remains suitable for their retention for racing or public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
