VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, I was asked to re-examine the **TOO DARN HOT (GB) ex DREAMS AND WISHES 2023 Bay 2YO Filly**, brands **Capital V** nr shoulder, **81** over **3** off shoulder, to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of my client Dynamic Syndications at the Inglis Classic Yearling Sale, Warwick Farm, NSW on the **7th February 2025**, prior to the commencement of the Sale where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (normal). I advised my client at that time; in my opinion the filly was suitable for their purchase with an overall rating – **PASS, 7+**.

Clinical Examination:

This re-examination was conducted at Bimbadeen Park, Werombi, NSW, on 1st October 2025. The filly has been spelling since the yearling sale at Gooree Park, Mudgee, and had arrived ready to commence breaking-in. This inspection was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and conformation. No abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The filly has a quiet temperament.

The filly remains a high-quality individual, athletic and free moving. She is well conformed and well balanced. The filly has grown significantly since he was purchased and now stands an acceptable 15.0hh. However, she is still immature and will develop further. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed. All clinical parameters were found to be within normal limits.

Conclusion:

In my opinion as at the **1st OCTOBER 2025**, the date of re-examination, **TOO DARN HOT (GB) ex DREAMS AND WISHES 2023 Bay 2YO Filly**, is in so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
1st October 2025

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long-standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a veterinary examination of the bay thoroughbred yearling filly by **TOO DARN HOT (GB)** out of **DREAMS AND WISHES 2023** (as described in the Inglis Classic Yearling Sale 2025 catalogue), was performed at Inglis Riverside Complex, Warwick Farm, NSW on the 7th February 2025.

Identification:

Brands:	Near Shoulder:	Capital V
	Off Shoulder:	81 over 3

Clinical Examination:

The filly was presented in excellent clinical health, with even muscle mass and well conformed. She was still very immature due in part to her later date of birth. Upon examination all clinical parameters were found to be within normal limits. Ophthalmic examination determined no issues of concern. Auscultation of the thorax (chest) revealed a normal and regular heart rhythm at rest, with the filly having normal lungs sounds and normal respiratory rate at rest. At the time of this examination there were no issues of concern regarding her extremities.

Repository:

The radiographic and pre scale upper airway endoscopy examinations pertaining to this horse lodged in the repository at the Inglis Riverside complex were examined and the findings were as follows:

Radiographs: Low Risk

Upper Airway Examination: Normal anatomy with Grade 1 function (Lane).

Conclusion:

In my opinion, at the time and within the limits of this examination the thoroughbred filly by **TOO DARN HOT (GB)** out of **DREAMS AND WISHES 2023** in so far as can be determined within the scope of this examination, is suitable for syndication and all risk mortality insurance cover.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
7th February 2025
