E-mail: wollondillyequine@bigpond.com

Date: 12th November 2013

Horse Name: Al Baidaa (AUS)

Description: 2yr old Bay Filly

Microchip No: 985100012002064

Brands: NSS:  OSS: 28 over 1

I examined the above horse to assess its suitability to syndicate as a race horse.

The examination performed was a general health check which included taking the horse's temperature, checking mucous membrane colour, pulse quality and respiratory system. Cardiac and thoracic auscultation were performed. The eyes were assessed for vision. Musculature symmetry and basic conformation were assessed. No abnormalities were found.

There was no lameness at the walk and trot and no response to hoof testers was found. On palpation and manipulation of the legs and major joints no abnormalities were found.

No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscopy were performed.

Obviously the above mentioned special procedures would be necessary to diagnose certain joint problems such as OCD or problems with the upper respiratory tract.

Please do not hesitate to contact the undersigned if you have any queries regarding the above.

Kind Regards

Dr Andrew Argyle B.V.Sc (PRET)
