

# FIT FOR SYNDICATION

HORSE: UNNAMED

SIRE: SNITZEL

DAM: LAURINEL ARGIE

DESCRIPTION: CHESTNUT FILLY

BRANDS: NSS: C DIAMOND C  
OSS: 35 OVER 3

MICROCHIP NUMBER: 985100012033792

DATE: 8 / 1 / 2015

On 8<sup>th</sup> January, 2015, the above-described horse was examined for the purposes of a PDS for syndication for Dynamic Syndications.

Based on the examination, which involved a clinical examination, endoscopic examination of the upper respiratory tract, and full series of radiographs, this horse is considered fit for syndication for racing purposes and mortality insurance.

Should you require further information regarding this horse, I can be contacted on 0412 501 999.

Regards,

Dr John B. Walker BVSc

This certificate has been prepared for the inclusion in the disclosure statement of the thoroughbred in question. This certificate may be relied upon by potential investors, however it does not constitute a "pre-purchase" examination. I certify that I have no current, nor contemplate, future interest in the above-described horse, other than in the supply of the Veterinary opinion of suitability for racing. Furthermore, I am aware that this report is provided to Dynamic Syndications for use by them in promoting the sale of the above-described filly.

Date: 10th July 2015

Horse Name: Laurinel Argie/Snitzel 13

Description: Chestnut Thoroughbred Filly

Microchip No: 985100012033792

I examined the above horse to assess its suitability to syndicate as a race horse.

The examination performed was a general health check which included taking the horse's temperature, checking mucous membrane colour, pulse quality and respiratory system. Cardiac and thoracic auscultation were performed. The eyes were assessed for vision. Musculature symmetry and basic conformation were assessed. No abnormalities were found. A small healed scar was present on the near hind fetlock and a splint was present on the near foreleg

There was no lameness at the walk and trot on a straight line and on a circle. The horse was sound post flexion and no response to hoof testers was found. On palpation and manipulation of the legs and major joints no abnormalities were found.

On endoscopic examination the horse was a grade 1 out of 5 (Normal laryngeal function)

No ancillary procedures such as radiographs, blood tests, drug sampling or ECG were performed.

I certify that I have no current or future interest in the above horse other than the supply of this veterinary opinion of the above examination.

Please do not hesitate to contact the undersigned if you have any queries regarding the above.

Kind Regards

Dr Andrew Argyle B.V.Sc (PRET)
